

To use the SciVerse ScienceDirect app, users must first register for an account by registering from Emory's [ScienceDirect](#) page. It is recommended that you register using your Emory email account. Start from the [Databases@Emory](#) page at: <http://web.library.emory.edu/library-materials/collections/databases/index.php> and locate [ScienceDirect](#). The direct URL for ScienceDirect is: <http://libcat1.cc.emory.edu:32888/DB=sciedirect>. When taken to the ScienceDirect page, you will see the "Register" link in the top right corner of the page.

Once you register for an account:

- Go to the [Apple App Store](#), or [Google Play Store](#), download and install SciVerse ScienceDirect.
- When you launch the app, you will be asked to login with the account you created from Emory's ScienceDirect page.
- You will then be asked to validate your account. If your account needs to be validated, you may see a message asking you to validate your email address.
- From your mobile device, check your Emory email for the validation message from Elsevier and click on the validation link. If you do not receive an email from Elsevier.com, please check your spam folder or your "Quarantine Summary" message that you receive from the Emory email system. You may have to enable the delivery of the message from Elsevier.com. You are now ready to access ScienceDirect.

If you have any issues with installing or launching your SciVerse ScienceDirect app, please contact us at "Ask a Librarian" by visiting: <http://health.library.emory.edu/ask-librarian>.
