

Updating Journal Article Links on Blackboard, Handouts, Websites

Because of recent upgrades to library systems, some links to specific e-journal articles (on websites, bookmarks, handouts, etc.) need to be changed by **May 9, 2016**.

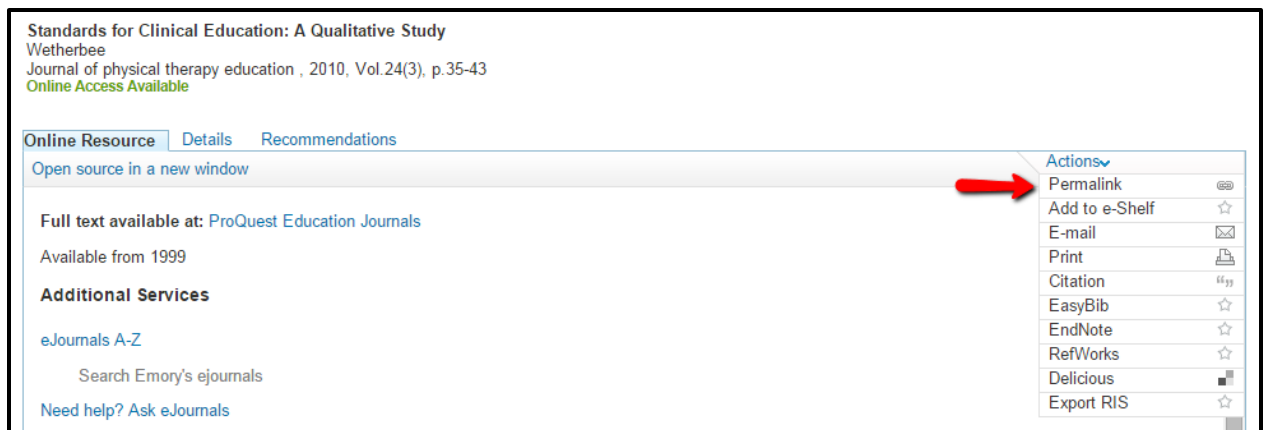

- Course instructors will be responsible for updating links to articles that do not go through the Library Course Reserves system.
- Library staff will correct links that are managed through the Library Course Reserves system.

Links that need to be updated will have a URL that begins with <http://sfxhosted.exlibrisgroup.com/>.

To avoid uninterrupted access to e-journal articles, use one of these methods to create new permanent links. Option #1 only works through May 9; be sure to correct links for summer and fall course documents, too.

OPTION #1 Use the existing SFX-based link **Use this method through May 9th, 2016.**

1. Click on your SFX-based link.
2. You will be taken to a page within discoverE (Emory's library catalog). Click on the **Actions** tab, and select **Permalink**.

Standards for Clinical Education: A Qualitative Study

Actions

- Permalink
- Add to e-Shelf
- E-mail
- Print
- Citation
- EasyBib
- EndNote
- RefWorks
- Delicious
- Export RIS

3. Copy the entire link from the pop-up Permalink box.

Permalink

http://emory-primoprod.hosted.exlibrisgroup.com/openurl/01EMORY/01EMORY_services_page?ctx_ver=Z

4. Use this copied text as your new link.

OPTION #2 Use the  Button in a database

Use this method after May 9, 2016.

If you are accustomed to locating articles using a database such as PubMed, you can generate a permanent link to the article from the Find It @ Emory Button.

1. Click on **the Find It @ Emory Button** in any Emory database or Google Scholar
2. Click on the **Actions** tab and select **Permalink**.

3. Copy the entire link from the pop-up Permalink box.

4. Use this copied text as your link.

Please contact the Woodruff Health Sciences Center Library if you need assistance updating links.
